PROFILE

As a freelance developer I strive to make my products with an utmost care and the highest quality. In the future I would like to join to a big project in an experienced team so that I could improve my skills.

EXPERIENCE

1.Developer 10.2022 - presently
Karmoto

The application has been created for e-commerce in order to freely control the entered data. Web system allows a customer to view available products and contact a trader. The latter, on the other hand, has full control over all the data he introduced to the system.

https://karmoto.pl

- **Techstack: Angular, Typescript, Firebase (REST API), Bootstrap, RxJs,Git, Github**

2.DVM 03.2021 -presently

Interacting with a diverse range of clients has allowed me to enhance my communication abilities, including active listening, empathy, and effective problem-solving. By actively engaging with clients, I have learned to understand their needs and concerns, and effectively address them to ensure their satisfaction.

3.Developer 09.2020 - 03.2021
Internship in SoftServe (Angular/Typescript)

- working with Jira, Canva and Scrum methodology
- working with GitHub as a hosting service for Git repositories
- managing UI (implementing changes and new features)
- bug fixing
